Nature, News & Notes

October/November 2013

An Interview with Carissa Lovett, President of the Wabash Valley Audubon Society

I know you work at Dobbs Park. What exactly is your title, and what education and experience led to your current position?

I'm the Naturalist at the park, and I've been in that job for sixteen years. My prior job was at the Native American Museum at Dobbs, and before that I worked for a year at Turkey Run Nature Center. I have a B. S. in Life Science from Indiana State, where I worked on bat research with Dr. Whitaker.

When did you decide you wanted to do this kind of work?

Well, the fact that my first word was "Suzy," the name of the neighbors' dog, was probably a good clue that I'd end up working with animals! I grew up in a rural area, and mom didn't let us come in except to eat lunch, so I was used to being in the outdoors.

September 28 (9:00am – 2:00pm) Invasive Species Removal at Dobbs Memorial Grove Nature Center – 5170 E. Poplar St. 812-877-1095

WVAS Fall Member Meetings

Mr. Michael Litwin will be talking about the Wabash River at our October 16 meeting. The title of his presentation is "Freshwater Fish and the Wabash." Included in his presentation is information on streams and rivers, the fish that inhabit the Wabash River, and the invasive Asian carp as well. Mr. Litwin is a recently retired fishery biologist of the US Fish and Wildlife Service in Bloomington, IN.

Also, Hardy Lake State Recreation Area's Dwight Chamberlain Raptor Center will be presenting their program on November 20. The Raptor Center takes in injured and orphaned birds of prey for the purpose of rehabilitation and release back to the wild. The center has about ten permanently injured birds that they use for educational programs, which they will share with us next month.

(Carissa Lovett, Continued from page 1)

Obviously, you like bats....

They're the coolest creature on earth; unusual and misunderstood. I guess I love the things that other people don't.

But they're mammals. I've got to find out what your favorite bird is.

That's hard. I like so many... It's not Hummingbirds. Hummingbirds are mean. Well, maybe it's wrong to say mean. They have spunk. I'm going to say the White-Breasted Nuthatch. They're just so darn cute!

Your job involves working with people as well as flora and fauna. What's the biggest problem humans at the park pose?

Littering is a continuing annoyance, but the biggest headache is people leaving fishing line. It's not just a little – it could be 50 feet. This is dangerous. We had a duck that lost its foot last year because it got caught in fishing line.

You do lots of educational programs. What are some of your favorites?

Of course, I like the bat program. And taking kids out on the trails is fun.

Do you have a favorite age group to work with?

Not really. I like a group of any age that asks insightful questions. Second and third grade groups are generally good. They're young enough that everything is still cool, but old enough to interact.

Can you think of any examples of how kids today are clueless about nature?

I'm always surprised when kids don't know what a squirrel is. They have some idea – a cartoon idea – of chipmunks, but sometimes they think chipmunks are baby squirrels.

Jackson-Schnyder Nature Preserve Fall Foliage Hike - October 19

The Ouabache Land Conservancy (a 501(c)3 non-profit land trust) invites everyone to a fall foliage hike of the Jackson-Schnyder Nature Preserve on Saturday, October 19th. This hike is to celebrate the four-year anniversary of its dedication as a state nature preserve. Meet at the Preserve at 10:00 AM and hike until approximately 12:00 noon. Dr. Marion Jackson, the Preserve's namesake and author of *101 Trees of Indiana*, will lead hikers through the tallgrass prairie and approximately 25 species of trees found on the 15-acre Preserve.

To get to the Jackson-Schnyder Nature Preserve from Terre Haute

- ◇ take Hwy 150 to St. Mary's Ave.
- ◇ continue west past St. Mary-of-the-Woods College
- ◇ turn left on Bloomtown Road
- ◇ go under the railroad
- ◇ turn right on Concannon Ave
- ◇ The roadside entrance to the Preserve is just past the bridge (on the right).

The land trust's mission is to protect natural lands and farmlands from development in perpetuity. Ouabache Land Conservancy serves the west central Indiana counties of Clay, Fountain, Montgomery, Owen, Parke, Putnam, Sullivan, Vermillion, and Vigo. For more information about the Ouabache Land Conservancy go to www.ouabachelandconservancy.org

The Wabash Valley Audubon Association would like to welcome the following members who joined or in the case of one member, transferred to the Valley area, during our summer hiatus. We hope to be able to greet you at our October meeting.

Karin Stanley	Sherry Stockon	Thomas Trefry
